PROFILE

Security engineer at IBM Security, building Python automation and detection logic for attack surface management (Randori, part of the QRadar suite) as the sole Ireland based engineer on the team. I design and ship MCP servers and agent integrations that turn repetitive workflows into clean tooling. Outside work I run VNTA Group, a portfolio of premium ventures.

SKILLS

Security	Attack surface management, detection engineering, threat analysis, CPE vulnerability correlation
Automation and AI	Python, CLI tooling, MCP and agentic systems, FastMCP, security automation
Data	Data analysis, statistics, SQL, regular expressions, service fingerprinting
Platforms	IBM Randori, QRadar suite, Git and GitHub, Jekyll, SvelteKit

EXPERIENCE

Security Engineer, Randori

IBM, Ireland, Hybrid · Jan 2024 to Present

- Build Python CLI tooling and MCP based agent workflows that streamline detection and targeting, and scripts that automate data collection.
- Sole Ireland based engineer on the team, independently developing detection rules that improve customer security posture.
- Write regex rules that fingerprint software, services and versions, then correlate findings with known vulnerabilities via CPE mappings.
- Identify attack vectors such as exposed login fields and default installations, and recommend mitigations. Support customer and sales teams with technical troubleshooting.

Cybersecurity Intern

Dell Technologies, Limerick (Remote) · Feb 2022 to Aug 2022

- Six month placement in Dell's Security and Resiliency Organization: alert monitoring, incident triage, vulnerability scanning and patch prioritisation.
- Wrote a LinkedIn article and video on the internship, with eight practical tips for incoming interns.

Database Engineering Intern

Brown Thomas Arnotts, Dublin · Summer 2021

- Built and maintained SQL databases for retail operations and reporting, including data integrity, backup and access control processes.

ENTREPRENEURSHIP

Founder

VNTA Group, Vantanéant International Ltd, Dublin · Nov 2024 to Present

- Parent company behind Vendr, Éirvox and Maison Seul. I lead strategy, brand and operations across the group, building shared infrastructure so each company scales on common foundations.
- Vendr (2026): premium, fully managed vending for modern workplaces. Strategy, partnerships and rollout across Vendr Pass and Vendr Select.
- Éirvox (2025): a curated marketplace for premium goods in Ireland. Product, brand and engineering direction, from identity to platform architecture.

PROJECTS

SpaceXplorer

Final Year Project, National College of Ireland, spacexplorer.info · 2022 to 2023

- Explored the SpaceX and NASA APOD APIs with data science and machine learning, publishing the findings and live launch statistics as an open source site.

EDUCATION AND CERTIFICATIONS

BSc (Honours) Data Science, Level 8

National College of Ireland · 2019 to 2023

IBM Trustworthy AI and AI Ethics (2024) · IBM Python for Data Science (2024) · 16 credentials on LinkedIn

VOLUNTEERING

- Dell Technologies, 2022: TecKno.dell.com content, EMEA intern onboarding panel, Transition Year Program mentor.
- CSinc.ie, TU Dublin, 2022: Computer Science Inclusive, improving how computer science is taught through camps, workshops and teacher CPD.
